Re: Notification of Sewer Rehabilitation Project

This notice has been prepared to inform you that the City of Salem will be beginning a construction project in your neighborhood to improve the functionality and reliability of the sewer system. The project will include installation of a cured in place liner in the existing sewer pipe. See attached map for project lining extent. The City is hosting a ZOOM meeting on March 9th at 6:00 p.m. to discuss the project, please refer to Zoom meeting details which are attached.

Beginning the week of March 14, 2022, the City's Contractor (National Water Main.) will mobilize to the site and begin installation of a cured in place liner in the existing sewer pipe. This work is expected to take approximately two weeks to complete, but schedule may be extended by weather.

During certain phases of the operation, you may detect an odor from liner installation, and you may hear noise of machinery and steam emitting from manholes in the neighborhood.

The work hours for this effort are 7:00 am to 7:00 pm but may be extended later due to liner curing time. During this project, the area will be an active construction site and you should be careful and drive at a reduced speed accordingly. On the days when the Contractors are working, it is important not to have cars parked in the roadway. No parking signs will be posted in advance of construction and no-parking will remain in effect until construction is complete for that day. You will always have access to the street and your driveways after work hours. Police details will be present to assist everyone through the work zone and to facilitate traffic management.

We apologize in advance for any inconvenience you may incur during this process. The City appreciates your patience and forbearance during this project. If you have any questions, or require additional information, please call my office at 978-619-5675.

Sincerely,

David H. Knowlton, PE
City Engineer/DPS Director
