

ADDENDUM #1
INVITATION FOR BIDS 17-04
FIRE STATION FLOORING PROJECT
SEPTEMBER 22, 2016

Clarifications:

1. The cover of the original version mistakenly listed the due date as September 29. The due date is **September 28, 2016 at 2:00 PM**. A corrected version has been posted.
http://www.salem.com/sites/salemma/files/uploads/17-04_ifb_final2_2.pdf
2. The revised version also has an updated floor plan.
3. There is a small shower room off of the men's bathroom that should have been included in the IFB. It adds approximately 30 S.F. to the amount of tile needed.

Questions:

1. Is the contractor to remove existing carpet and put new carpet over VCT tiles that have not been abated?

Yes, provided glued down existing carpet does not pull up the tiles underneath, in which case the project would be separated out to another abatement.

2. Does that carpet have to be listed for public building (i.e. flame spread)?

Yes, the carpet does have to meet the applicable standard.
